

FOOD VENDOR ENVIRONMENTAL PROGRAM

The Colorado Dragon Boat Festival takes a very proactive and committed stance pertaining to environmentally sound practices. The purpose of this program is to utilize recycled materials wherever possible, and to minimize the amount of non-recyclable waste generated by the event. All Food Vendors are asked to participate in this program, which has the following requirements:

Serving Equipment - Food Vendor agrees that all food will be served on recyclable paperware and with recyclable plastic utensils if possible.

Cardboard Recycling - Food Vendor agrees to flatten and segregate cardboard boxes from trash and place them in the designated cardboard receptacles provided by CDBF.

Packaging Materials - Food Vendor agrees to purchase supplies that utilize cardboard only packaging, e.g. purchase corn in crates made from recyclable cardboard instead of crates made from non-recyclable wood or metal.
